

PRODUCT USE GUIDE FOR CITRIC ACID DESCALER K39

Product Description

A naturally derived descaling agent which enables rapid removal of scale deposits, metal tarnish, hard water scale and rust from ferrous metals. The properties of this product enable it to be used extensively in the catering and food industries for general purpose cleaning and descaling.

Product Features

- Gently removes the white deposits caused by lime from all types of kettle leaving them sparkling bright.
- Food safe.
- Suitable for use on stainless steel
- Suitable for use on all plastics.

Direction for Use

For General Descaling:

Add 1 part product to 5 parts water. **Always add acid to water, not water to acid.**

Apply by swab, brush, non-misting low pressure spray or immersion. Allow for removal of scale or tarnish. Thoroughly rinse components after treatment with clean water. Do not allow prolonged contact. Repeat descaling process if necessary.

For Dishwashers:

Use a 50:50 solution. Continue to apply to scale until fizzing has ceased, carry out wash cycle with no load to completely remove any traces of product. Repeat if necessary.

For medium to light scaling of swimming pool sides

Dilute 1 part product to 5 parts water. For severe scale use undiluted. Apply using mop cloth or machine, taking care to minimize any contamination of the pool. Leave a few minutes allowing to react, repeat if required. Rinse well with clean water.

For Kettles:

Fill kettle almost to the top, bring to the boil and leave for 5 minutes to cool slightly
Measure approximately 100ml of product into the kettle using the measure on the bottle
Leave to stand for 15-30 minutes depending upon amount of limescale present
Empty and rinse thoroughly with clean water
Repeat above process if required
Refill the kettle and bring to boil, and then rinse twice with fresh water before using

Caution: This product is acidic and will damage carpets and textiles. If spillages occur, remove the surplus acid with a damp cloth and neutralize as soon as possible with washing soda or baking soda. Clean thoroughly with a proprietary carpet shampoo. Contact with bleach based products may produce toxic chlorine gas.
